OVERVIEW

The All-Africa Students Union in collaboration with the Prescott Medical Center and the junior common room (JCR) of the University of Professional Studies, Accra (UPSA) organized a breast cancer screening and awareness talk on the 25th of October, 2024 at the UPSA Hostel C conference room. This initiative aimed to increase awareness about breast cancer, educate participants on early signs and risk factors, and provide free screenings to encourage early detection.

EVENT HIGHLIGHTS

1. AWARENESS SESSION

The event began with an awareness session focused on educating attendees about the importance of early detection, self-examination techniques, and understanding early signs and risk factors associated with breast cancer. This session was instrumental in dispelling myths, promoting awareness of various treatment options, and addressing common misconceptions about breast cancer.

2. SCREENING PROCESS

A total of 86 participants took advantage of the free breast cancer screening conducted by professionals from Prescott Medical Center. The healthcare team performed clinical breast examinations, shared guidance on self-examination techniques, and addressed participants' concerns and questions regarding breast health.

3. IMPORTANCE OF PARTNERSHIPS

This event highlights the essential role of partnerships in addressing community health challenges. The collaboration between AASU, Prescott Medical Center, and the UPSA JCR not only made the event possible but also enhanced its reach and effectiveness. Such partnerships underscore the value of united efforts in creating a more informed and health-conscious student community.

4. FUTURE INITIATIVES

Building on the success of this event, AASU and Prescott Medical Center plan to expand breast cancer awareness activities to other campuses and communities across Ghana. Future initiatives will involve ongoing educational workshops, additional free screening events, and collaborations with other health organizations to broaden the impact and accessibility of breast cancer prevention resources.

5. COMMUNITY IMPACT

The breast cancer awareness talk and screening provided students with essential knowledge and practical tools for self-care and early detection. This initiative empowered students to take control of their health and created a supportive community environment focused on wellness and preventive care.

CONCLUSION

The event began with an awareness session focused on educating attendees about the importance of early detection, self-examination techniques, and understanding early signs and risk factors associated with breast cancer. This session was instrumental in dispelling myths, promoting awareness of various treatment options, and addressing common misconceptions about breast cancer.
