BACKGROUND OF THE EXHIBITION AND CONFERENCE

Egyptian Authority for Unified Procurement partnered with the All-Africa Students Union to organize its maiden health exhibition and conference dubbed “Africa Health ExCon” under the auspices of H.E President of Arab Republic of Egypt, Abdel Fattah El-Sisi which was convened on 5 to 7 June, 2022 in Cairo-Egypt at the Al Manara International Conference Centre, Cairo.

The AfricaHealthExCon gathered over **800 participants** from all over the Continent in partnership with the All-Africa Students Union to contribute to the implementation of health development. The conference sought to refocus the minds of those operating in the Health and Pharma business to Africa's investment potential and healthcare industry in Africa through the right sourcing of products and equitable distribution to the continents health agenda in ensuring equitable access of quality health technology products and services to all African countries. It also had the goal of creating equitable access to quality health technological products and services to all African countries, ensuring that the health and pharma business thrives in Africa, as well as incubating health innovation in Africa.

AASU's ROLE /CONTRIBUTION

- 1 AASU leveraged on its grass root mobilization capacities in facilitating the participation of African in Health across the continent. The selection process entailed;
 - Publication on the Union's various social media platforms and website.
 - Call for Applications
 - Selection of student participants
 - Journey Preparations (Dissemination of Journey Instructions, Preparation of Introductory Letters)
 - Coordinating ticket Itineraries and visa arrangements.
- 2 The All-Africa Students Union (AASU) played a vital role in promoting the conference during and post the event through marketing tools and networks of communication (website, social media, email campaign).
- 3 The All-Africa Students Union (AASU) will link the Egyptian Unified Procurement Authority (UPA) with healthcare entities (associations, organizations, and foundations) to facilitate their effective participation.

PARTICIPATING COUNTRIES

AASU embarked on a rigorous and fair selection process that saw fifty (50) students offering courses in health-related fields to participate in the said conference. Selected applicants were fully funded for the event. These fifty selected participants were from within our member states, namely; Nigeria, Ghana, Cote D'Ivoire, Gabon, Chad, Cameroon, Congo-Brazaville, Burundi, Tanzania, Botswana, Sierra Leone, Uganda, Lesotho, Zambia, Zimbabwe, Benin, The Gambia, Mauritius, Liberia, Kenya, Eswatini, Burkina Faso, Togo, Djibouti, Central African Republic, Libya, Tunisia, Somalia, South Africa, Sudan and Namibia.

CONFERENCE ACTIVITIES

The event commenced with an opening ceremony at the Manara Theatre, which hosted the president of Egypt, H.E Abdel Fattah El-Sisi. The president amongst other things spoke about the value of investing in the youth as 60% to 65% of Africa's population is the youth.

The Africa Health ExCon introduced a unique continuous educational session via education lectures, hands-on training and live surgeries highlighting the most trending and popular topics. A scientific committee made up of 29 medical professional members from diversified medical fields and associations highlighted the most trending and popular topics. Participants were engaged through insightful panel discussions handled by seasoned researchers and health professionals across the globe.

Medical innovators and leaders such as the minister of health in Egypt, Hon. Anifa from Uganda, Dr Maria from WHO, Dr Khaled Abdelghaffar (Egyptian Minister of Higher Education and Scientific Research and the Acting Minister of Health and Population), Dr. Harvey J. Alter (Awarded Nobel Prize in Physiology & Medicine), Dr. Raymond Francis Schinazi (Director of Laboratory Biochemical Pharmacology, Emory University) and Dr. John Ward (Director. Coalition for Global Hepatitis Elimination) were all present.

ACHIEVEMENTS

The Africa Health ExCon provided a major platform for integrating medical production and development on the Continent.

Students and Health professionals across the continent were given the opportunity to be a part of medical innovation and integration in Africa.

An appreciable number of students secured internship opportunities through the conference.

The participation of youth from different parts of the continent fostered exchange of ideas and experiences in the health sector and afforded them opportunities to build networks for the future.

Participants were exposed to the numerous opportunities and innovations in the field of health.

CHALLENGES

Participants spending a great deal of time at the airport and hotel reception before having access to their rooms. This resulted in little or no time for rest after the long hours of travel, resulting in participant fatigue.

Difficulty in liaising with AASU's assigned UPA correspondent, resulting in coordination challenge on the day of arrival.

FEEDBACK FROM PARTICIPANTS

The event was highly successful with a 100% positive feedback from participants. All respondents stated their enthusiasm in recommending the conference and exhibition to their network. Participants also shared very valuable lessons and take homes with AASU.

General Comments and Lessons shared by participants:

- 1 I have learned that as a continent, we are doing well in so many areas in terms of health and innovations in the industry. But due to the economy of many countries in Africa, it's a bit difficult to bring in those ideas to fruition into our health systems. Anything is possible and as a continent, we can do so much more.
- 2 To grow in every ramification Africa needs effective collaboration. Better is done together.
- 3 I learnt that investing in nutrition especially to maternal (mothers) improves their health and, the child's health and reduces diseases. I learnt that neonatal resuscitation is important as it gives a chance to the child to survive in his/her early stages of life.
- 4 Networking is very important in the health sector is an opportunity for the development of Africa.
- 5 There are lots of innovations in the medical technology field. Also the commitment of the host country to eradicate hepatitis is worth emulating.
- 6 It was an amazing experience for me, would love for it to continue annually.
- 7 Well organized conference from preparation to the actual conference.
- 8 Ma première leçon c'est que j'ai pu comprendre que c'est plus que nécessaire être bilingue dans ce monde : Anglais et Français; Deuxièmement ça m'a permis de voir que la jeunesse africaine est engagée dans leur pays et que chaque jour travaille pour impacter leur communauté.
- 9 Très très pertinent pour l'intérêt de l'Afrique et de l'humanité. C'est événement est arrivé au bon moment. Au moment où l'humanité fait face aux grandes menaces sanitaires.
- 10 La conférence était de haut niveau international ; bien organisée même mais les organisateurs ont oublié les petits détails nécessaires à la réussite d'une conférence entre autres. Le fait qu'ils n'ont pas disponibles les carnets et stylos pour les participants ; et les participants n'avaient pas de WIFI pour pouvoir se connecter au monde extérieur et dernièrement le timing était trop serré comparé à la durée de notre séjour. Je proposerai également d'ajouter au moment de la clôture la soirée culturelle ça permet de découvrir encore plus l'autre via sa culture.
